

i-scrub[™] 26H

A revolutionary
light in the dark

Advanced soft edge technology

The microfiber hand range cleaner with integrated LED or black light will make sure the job gets done. Complete with patented soft-edge technology which allows the user to clean round areas. Need to reach high-up places? Just switch the handle for a telescopic tube, and you are good to go! You are 50% faster than with a regular microfiber cloth and more ergonomic handling for your operator.

Rubber grip

A handy rubber grip will make your task a lot easier, and will not scratch, damage or cramp your most important instrument: your hands. Red, green and yellow grip available!

Key features

Integrated black or LED light

Make everything spotless in your washrooms by pre-examining your work with the choice between an integrated black or LED light inside of the handle. Make the unvisible visible.

Microfibre pads

Premium pads with mesh backing with Trio split technology. Solid color exclusive microfiber material. Used for low to heavy soil levels and all other applications.

i-scrub 26h LED light

Soft edge technology

Patented soft edge technology which allows the microfiber pads to clean round areas such as sinks and other curved materials.
