i-mop 46 MODULAR
Designed for easier maintenance, smarter service and longer product life.

The quick-release system makes it easy to swap parts without tools.

Why choose i-mop 46 MODULAR?

More water on board. Fewer pit stops.

- 4.6 L clean water capacity
- 6.5 L recovery tank
- Clean up to 600 m² in standard mode*
- Clean up to 960 m² in eco mode*
- Up to 80 min runtime with one i-power 14 battery

Replace the part. Keep the machine.

- Modular, serviceable platform
- Tool-free quick-release system
- Swap key parts individually
- Easier maintenance
- Less downtime
- Longer product life (5-10 years)
- Joins a family already built around modular design.

The Original i-mop, evolved

- Original i-mop innovation since 2014
- Built on continuous development
- Designed around the cleaner
- Protected by 50+ patents
- part of the i-team ecosystem
- 3-year warranty (Excluding batteries)

The i-mop 46 MODULAR carries forward trusted i-mop XL performance in a smarter, more efficient platform. It is designed to reduce interruptions and make service easier and keep cleaning teams moving for longer.

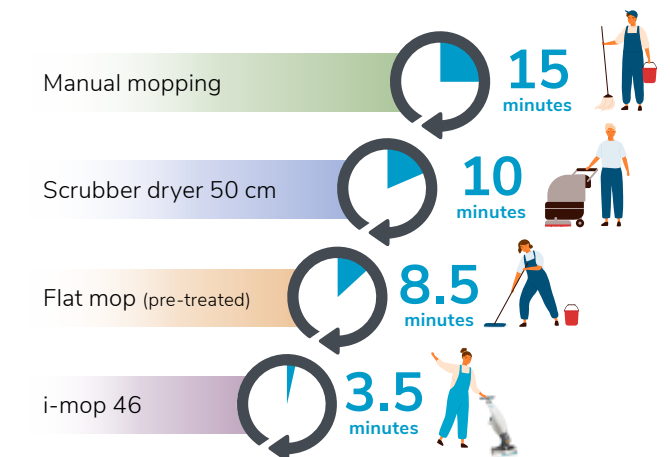

* Theoretical performance

Large enough to cover ground Agile enough for real spaces

Spaces are rarely just open floors. They come with aisles, corridors, entrances, people, furniture and obstacles. The i-mop 46 MODULAR combines the capacity to cover ground with the agility to move through those spaces. It gives cleaning teams professional scrubbing performance without losing the freedom of movement that makes the i-mop different.

The difference is easy to see

Time* needed to clean 100 m²

One tank. More floor.

More capacity means fewer interruptions. The i-mop 46 MODULAR can clean up to 600 m² in standard mode or 960 m² in eco mode before the next refill, helping cleaners spend less time at the water point and more time on the floor.

Every drop works harder

Traditional mopping uses and leaves behind more water than needed. The i-mop 46 MODULAR applies, mechanically scrubs and immediately recovers the solution, helping use water more efficiently while leaving less behind on the floor. That means less water, faster drying and a cleaner result.

Made for real cleaning routes

The i-mop 46 MODULAR is especially suited to environments where capacity and agility need to work together, including supermarkets, schools, hospitals, public spaces, swimming pools and facility management operations. When a mop is too slow and a walk-behind too bulky, the i-mop 46 MODULAR fills the space in between.

Smart support in every move

Ergonomic support

The patented i-balance spring system helps reduce physical strain during daily cleaning. It lowers the weight in the hands from 3 kg to just 0.7 kg, making the i-mop 46 MODULAR feel lighter and easier to guide.

Manual mopping also requires around 350 movements per 100 m², compared to around 40 movements with i-mopping. Fewer repetitive movements, less strain and more comfort throughout the route.

Like cruise control for cleaning

Drive & Park support helps the cleaner maintain a smooth, steady pace with less effort and more control.

With a simple foot action, the support system can also place the i-mop in the correct parking position without lifting the deck. That makes it easier to pause, switch tasks and continue when needed.

Ready to walk with i-walk

For teams that want to take productivity even further, the i-mop 46 MODULAR can also be used with i-walk.

This creates new possibilities for a more automated cleaning workflow on larger routes, while keeping the flexibility of the i-mop system.

Two versions: Plus and Pro

The difference? The Pro version adds smart connectivity and i-dose support for teams that want more control over data, dosing and daily operations.

Feature	i-mop 46 MODULAR PLUS	i-mop 46 MODULAR PRO
i-link connectivity	X	✓
i-dose tank	X	✓
